Objective
- To obtain a position in the field of Information Technology where I can apply and enhance my skills in software development

Summary
- Ability to effectively communicate both in written and oral as well as active listening.
- Ability to collaborate and work well within a group and individually
- Ability to adapt to fast paced and changing work environment with passion for technology
- Ability to manage time effectively, prioritize tasks and meet deadlines
- Ability to demonstrate strong analytical, problem solving, and critical thinking skills
- Technical support experience

Technical Skills
- Proficient in programming languages such as C++, Java, Python, VB.NET
- Experience in database management systems like Microsoft SQL and MySQL
- Knowledgeable in web development using CSS, HTML, JavaScript, and PHP
- Familiarity with operating systems such as Windows, macOS, and Linux
- Knowledgeable of networking protocols and technologies such as TCP/IP, DNS,DHCP, LAN, and WAN
- Proficient in maintaining and repairing a diverse range of equipment, with expertise in effective troubleshooting and problem-solving techniques.

Experience

OJT Training, Palace Computer Enterprises
Ilagan Subdivision, Calicanto, Batangas City
From February 22, 2023 to May 31,2023

- Provided technical support, resolved computer issues, activated operating systems for clients, enhancing problem-solving skills, technical knowledge, and ability to work in a professional environment, effectively meeting client needs.
- Assisted clients with various technical issues, including organizing and creating UTP cables with RJ45 connectors, ensuring proper cable organization and secure attachment of connectors, enhancing my skills in cable management and installation.

Projects
- Barangay Management System
  - Developed and designed user interface that are both user-friendly and aesthetically appealing
  - Utilized HTML, CSS and JavaScript technologies
- e-Commerce Website
  - Developed and designed a fully functional e-Commerce website which includes admin panel for managing products, orders, and customer information
  - Performed compatibility testing across different browsers and devices
  - Utilized technologies such as HTML, CSS, JavaScript, and PHP
- Reporting Android Application
  - Developed and designed a fully functional Android app with the following features
    - Allows users to report vehicle incidents
  - Created an admin website with following capabilities
    - View and manage the reported vehicle incidents
  - The Android app and admin website work together seamlessly to ensure efficient reporting and monitoring of vehicle incidents
  - Utilized technologies such as HTML , CSS , Java, JavaScript, and PHP
